संत कबीर हिंदी साहित्य के श्रेष्ठ कवि थे। वे निरक्षर थे पर उनका ज्ञान किसी विद्वाल से कम नहीं था। वे मस्त्वौला, फक्कड़ और लापरवाह फ़कीर थे। उन्हें न तो तत्कालीन शासकों का कोई भय था और न ही धार्मिक सम्प्रदायों का।

कबीर की प्रामाणिक रचना 'बीजक' है, जिसमें तीन भाग साखी, सबद और रमैनी। इनमें कुछ रचनाएँ गुरुग्रंथ साहब में भी संकलित हैं।

कबीर निर्गुणी थे। उनका मानना था कि ईश्वर विश्व के कण-कण में विद्यमान है। उसे कहीं बाहर ढूँढ़ने की आवश्यकता नहीं है क्योंकि वह सदा हमारे साथ है। कबीर ने गुरु को परमात्मा से भी अधिक महत्व दिया है। वे हिंदू-मुसलमानों में एकता स्थापित करना चाहते थे। इन्होंने जाति-पाति और वर्ग-भेद का विरोध किया।

Part III : English (Language II)

Passage : Read the passage and answer the questions.

Marketing refers to any activities that a company uses to promote its products and services and improve its marketshare. In order to be successful, marketing requires a combination of advertising savvy, sales, and the ability to deliver goods to end-users. This is normally undertaken by specific professionals or marketers who can work internally (for companies) or externally with other marketing firms.

Traditionally, corporations focused on marketing through print, television, and radio. Although these options still exist today, the rise of the internet led to a shift in the way companies reached consumers. That's where digital marketing came into play. This form of marketing involves the use of websites, social media, searchengines, apps—anything that incorporates marketing with customer feedback or a two-way interaction between the company and customer.

Increased technology and newer trends forced companies to change the way they marketed themselves. Email was a popular marketing tool in the early days of digital marketing. That focus shifted to search engines like Netscape, which allowed businesses to tag and keyword stuff to get themselves noticed. The development of sharing sites like Facebook made it possible for companies to track data to cater to consumer trends.

Smartphones and other digital devices are now making it easier for companies to market themselves along with their products and services to consumers. Studies show that people prefer using their phones to log on to the internet. So it should come as no surprise that 70% of

individuals make buying decisions (usually on their phones) before they actually hit the purchase button.
